SUMMARY

AI & Data Science engineering student with hands-on software development experience across REST APIs, full-stack web applications, and CI/CD-backed personal projects. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and DBMS. Practical exposure to backend development in Python, Git-based version control, and automated build pipelines. Seeking a Software Development Engineer role to build and ship production-quality software.

TECHNICAL SKILLS

Languages: Python, C, C++(Foundations)

Core CS: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Databases: SQL, MySQL Workbench, MongoDB

Tools & DevOps: Git & GitHub, CI/CD (GitHub Actions), Linux, VS Code, Cursor, Warp

Testing: Black Box Testing, Manual Testing, Regression & Smoke Testing, API Testing (Postman), PyTest, Selenium (Python)

AI/LLM: LLM,MCP,RAG

PROJECTS

LLM-Powered Cognitive Interview Assistant for HR Screening

- Designed an LLM-based HR screening assistant using the Gemini API.
- Implemented adaptive questioning, contextual understanding, and interview simulation logic.

PDF Q&A Assistant — REST API for a RAG System Personal Project

- Engineered a retrieval pipeline using LangChain and a Chroma vector store to answer natural-language questions grounded in uploaded PDF documents.
- Designed and exposed the pipeline as a REST API (Flask/FastAPI), served independently of the core retrieval/generation logic, and validated endpoints using Postman.
- Set up a CI/CD workflow with GitHub Actions to automate build checks on each commit, using Git/GitHub for version control throughout.

Web Scrambler

- Built a full-stack Next.js application that fetches and scrambles website content using multiple algorithms, with AI-powered content summarization and customizable visual themes.

RepoInsight — GitHub Profile Dashboard

- Created a web-based dashboard that fetches and visualizes a GitHub user's profile, repositories, and contribution activity via the GitHub API, surfacing top repositories, language usage, and contribution trends.

Football World Cup Outcome Prediction System

- Cleaned and analyzed historical FIFA match data using Python, Pandas, and Scikit-learn to build a Win/Loss/Draw prediction model, deployed through a Streamlit interface.

EXPERIENCE

Data Science Intern — Appin Technology, Coimbatore 8 Jul 2024 – 26 Jul 2024

- Performed data preprocessing, feature engineering, and model evaluation using Python, Pandas, and Scikit-learn.
- Delivered ML solutions for predictive analytics, customer segmentation, and anomaly detection.

In-Plant Trainee — AI Models on Cloud — Appex Technologies, Coimbatore 8 Feb 2024 – 15 Feb 2024

- Studied cloud deployment workflows and best practices for AI models.
- Explored deployment approaches across AWS, Azure, and Google Cloud Platform.

EDUCATION

B.Tech in Artificial Intelligence & Data Science Nov 2022 – May 2026
Kalaignarkarunanidhi Institute of Technology, Coimbatore | Current GPA: 7.48 / 10.0

Infant Jesus Matriculation and Higher Secondary School Apr 2020 – Apr 2022
Class XII – 71% | Class X – 75%

CERTIFICATIONS

- Python Foundation — Infosys Springboard
- Machine Learning Foundation — Infosys Springboard
- Data Mining — NPTEL (2024)
- Foundation of Data Science — Coursera
- Using SQL String Functions to Clean Data — Coursera

ACHIEVEMENTS

- Solved 175+ problems on LeetCode covering Data Structures and Algorithms, regularly participating in weekly/biweekly contests; secured a Top 80 finish at the CodeTrack v4.0 intra-college hackathon.
